Checklist

Veterinarian to read and check each box

1) Fiberglass impression

- I have reviewed and followed all OrthoPets instructions regarding limb positioning and fiberglass impression molding techniques.

2) Paperwork

- DVM signed Referral form
- Signed Customer Contract
- Measurement form
** If you are not sure of which form to use please contact your Case Manager
- SOAP notes

3) Media: Please email to OrthoPets, or include a disk/memory stick

- Digital radiographs are suggested. Please contact OrthoPets to discuss views and calibration marker.
- Photos of the affected limb with the impression held next to the limb, taken from the sagittal and frontal plane views at ground level.
- Videos of the patient walking, taken from the sagittal and frontal plane views at ground level.

Expectations Checklist

Owner to read and check each box

I understand:

- OrthoPets will be providing a medical device for my pet.
- I should be scheduling regular recheck appointments with my veterinarian as needed while my pet is using the prescription V-OP solution.
- I am required to send in fitting photos and video to my Case Manager in a timely manner as outlined by my Customer Contract.
- Rehabilitation can be very beneficial for my pet's transition to wearing a V-OP solution is recommended by OrthoPets.

OrthoPets Veterinary Orthotics & Prosthetics Fabrication Center will review your case submission and will contact you within **1 business day** to initiate your prescription prosthetic/orthotic solution.
